

TRAN MINH QUAN

Full Stack Developer

0379 442 860 • tranminhquan.acc@gmail.com • Ho Chi Minh City • GitHub • LinkedIn

CAREER OBJECTIVE

Seeking a Full Stack Developer position where I can apply my hands-on experience with ASP.NET Core, ReactJS, and relational databases to build reliable, user-focused applications. I aim to grow into a strong full-stack engineer by contributing to real-world products, learning from experienced teammates, and continuously improving my skills in backend architecture and modern frontend development.

EXPERIENCE

Full Stack Developer Intern — FPT Telecom

Aug '25 — Feb '26
Ho Chi Minh City, Vietnam

- Built and maintained backend services using **ASP.NET Core** and integrated **RESTful APIs**.
- Developed frontend features using **ReactJS**, **TailwindCSS**, Ant Design, and Redux Toolkit.
- Worked with **Oracle SQL** and Redis for data handling and performance optimization.
- Collaborated effectively within a team environment, contributing to debugging, troubleshooting, and continuously improving system stability and workflows.

Back-End Developer Intern — FPT Software

Nov '23 — May '24

- Built scalable backend logic, followed design specifications and coding standards using **C#**.
- Supported **RESTful API** integration, UI animation enhancements, and debugging across team modules.
- Stilized Entity Framework for efficient data access and implemented **Dependency Injection (DI)**, testing and maintainable code architecture.
- Demonstrated ability to work independently while maintaining strong communication and decision-making skills.

PROJECT EXPERIENCE

FCR — FTI Customer Request System — FPT Telecom

Aug '25 — Oct '25

- Designed and implemented backend APIs using **ASP.NET Core** to handle request lifecycle, data validation, and business logic processing.
- Built responsive and user-friendly interfaces using **ReactJS**, **TypeScript**, **TailwindCSS**, Ant Design, and Redux Toolkit.
- Collaborated with team members to analyze requirements, debug issues, and ensure system stability during development and testing phases.

VDS & AI CCTV Incident Alert System / Toll Station Weighbridge System — ITD Solutions

Mar '26 — Jul '26

- Completed a 4-month internship at ITD Solutions, participating in the development of an incident/event alert system for VDS devices and AI CCTV cameras.
- Contributed to a vehicle weighbridge (weigh-station) system project deployed at toll stations.
- Gained hands-on experience working with real-time data, event processing, and cross-team collaboration.

Eigakan — Real-Time Movie Sharing Platform — Graduation Project

Jan '25 — May '25

- Eigakan - Watch HD Movies Online . Built a real-time movie streaming platform enabling synchronized watch parties with integrated video calls for an interactive user experience
- Implemented features for publishers to upload content and advertisers to manage ads.
- Implemented real-time synchronization using **SignalR**, and integrated third-party services such as AWS S3, BunnyCDN, and Cloudinary.

SKILLS & INTERESTS

Programming Languages C#, JavaScript, TypeScript

Backend ASP.NET Core, RESTful API

Frontend ReactJS, HTML/CSS, TailwindCSS, Ant Design, Shadcn, Next.js

Databases SQL Server, Oracle, MongoDB

Tools GitHub, Figma, Insomnia, Postman, Dbeaver, SourceTree

Languages English-Basic

EDUCATION

Bachelor Degree in Software Engineering, FPT University campus HCM

Jan '21 — May '25
HCM

CERTIFICATIONS

Certified Ethical Emerging Technologist

Jul '23

Web Design for Everybody Basics of Web Development Coding
